

NOW available at Diabetes & Endocrinology Specialists, Inc. Eversense®: The Only Long-Term Continuous Glucose Monitoring (CGM) System

Dear Patient,

I am ever so excited to tell you about a new service the Diabetes & Endocrinology Specialists is providing for our adult patients with diabetes. Our practice is now trained to offer Eversense, with the first and only fully-implantable CGM sensor for confident long-term glucose monitoring.

Eversense makes glucose management easier:

- **No weekly sensor self-insertions.** We insert the Eversense sensor under the skin, and it lasts up to 90 days.
- **Quickly detects glucose highs and lows.** 85% of patients experienced improved confidence over their diabetes control.
- **Alerts you can see, feel and hear.** Three types of alerts: visual, auditory, and on-body vibes can provide you with an additional safety advantage, even during sleep.
- **Discreet and flexible.** Discreetly remove and reattach the smart transmitter, without wasting a sensor.
- **Mobile app.** Track events like meals and workouts and see them in graphs right on your smartphone to help identify trends.

“I love the fact that I can just peel off the tape, take a break from it, take a shower, and come back to my CGM whenever I like.”

—Morgan Fluhrer, Eversense patient

Eversense is available at our practice location:

Diabetes & Endocrinology Specialists, Inc

222 S. Woodsmill Rd
Suite 410
Chesterfield, MO 63017

Office: 314-469-6224

We look forward to telling your more about this life-changing device.

Sincerely,

Ralph Oiknine, MD

Diabetes & Endocrinology Specialist, Inc

For more information about Eversense please go to: eversensediabetes.com

The Eversense® Continuous Glucose Monitoring (CGM) System is indicated for continually measuring glucose levels in persons age 18 and older with diabetes for up to 180 days. It is intended to complement, not replace, fingerstick blood glucose monitoring. The sensor insertion and removal is performed by a health care provider. The Eversense CGM System is a prescription device; patients should talk to their health care provider to learn more. For important safety information, see <https://www.eversensediabetes.com/safety-info/>
